Smith, installing engineer for this concern, is in Omaha today consulting with W. R. McKean, Jr., superintendent of motive power and machinery of the Union Pacific. Mr. Brooks declares the railroads are looking for an impleuse business this year in the West and are demanding that the locomotives be delivered as rapidly as possible. About 70 per cent of the engines are for freight service. Special to The Tribune.

### RAILROAD NOTES

Vice-President and General Manager W H. Bancroft of the Oregon Short Line is expected to return Saturday afternoon, after a short trip to Idaho.

Pile-driving on the site of the new Denver & Rio Grande depot began Fri-day morning. Piling to last for at least a week is already on the ground, and more is expected from the Northwest some time next week.

C. E. Johnson of the Denver & Rio Grande has resigned his position in the freight department to open up business of his own. Mr Johnson has been connected with the railroad company for about four years. He is succeeded by J. Lezile Spencer.

The regular second class fare on all Western rallroads is a thing of the past. It was discontinued May I because of recent action of the Western Passenger association. Second class fares were about \$2 cheaper than first class. A first class fare had to be purchased in case the traveler desired to ride in a Pullman. The 2-cent-a-mile rate established in several States of the middle West is thought to have been responsible for the action of the Western Passenger association.

NEW YORK, May 1.—One of the miss-lng stock certificates which should have been in the possession of T. A. McIntyra & Co., brokers, at the time the firm falled, has been located with a local trust company, where it had been put up as part of collateral for a loan secured by the company. It is said that certifi-cates repretenting nearly \$100,000 which were supposed to be in the custody of the firm at the time it failed have not been found.
